EXECUTIVE SUMMARY

Platform Product Manager with deep expertise building data operations platforms, workflow orchestration systems, and AI/ML infrastructure at Amazon. Specializes in designing platforms that enable expert contributors to produce high-quality data at scale - including a human-in-the-loop document processing platform (95% automation, 5% expert review) processing 3M+ documents annually, and a multi-stakeholder integration platform scaled from 5 pilots to 1,000+ active users. Proven track record of driving throughput, cycle time, and quality metrics across complex, multi-team platform initiatives with influence without authority.

SKILLS & TOOLS

PLATFORM ARCHITECTURE: Platform Architecture & Design | API Strategy & Development | Integration Platforms | Multi-Stakeholder Platforms | Systems Thinking | Platform Scalability (5 -> 1,000+ users) | Platform Adoption & Growth

PRODUCT MANAGEMENT: Cross-Functional Leadership (Influence Without Authority) | Product Strategy | Roadmap Development | 0-1 Platform Building | User Research & Customer Discovery | Data-Driven Decision Making | Throughput & Quality Metrics | Stakeholder Management

TECHNICAL TOOLS: API Design (REST APIs) | Multi-System Integration | Data Architecture & ID Transformation | Event-Driven Architecture | Jira | Confluence | Figma | MS Office

PLATFORM SPECIALIZATIONS: B2B Platforms | AI/ML Data Platforms | Operations Platform Automation | Developer/User Experience Optimization | Platform Onboarding | Platform Health Metrics

EXPERIENCE

Amazon.com – Seattle, USA

2022 - Present

Sr. Product Manager – Technical

- **AI Workflow Orchestration & Automation Platform:** Architected and launched AI-powered document processing platform (OCR + ML) to automate 3M+ annual invoices, designing a human-in-the-loop architecture where 95% of tasks route through automated processing and 5% escalate to expert review. Reframed problem scope from 3.5M individual documents to 250 supplier templates, and further down to 60 pilot templates, enabling fast experimentation and model training. Drove throughput from 48h -> 4h, improved accuracy from 70% (manual baseline) to 85%+, and scaled platform from 5 to 40 suppliers, delivering \$2M annual savings from pilot.
- **Integration Platform & API Development:** Led VP-level initiative to build and scale integration platform from 5 pilot users to 1,000+ active users over 24 months, consolidating Whole Foods Market's 5 legacy systems into Amazon's centralized vendor portal. Designed 3-layer platform architecture (Presentation -> Transformation -> Data) with a custom API suite (Item Registration, Mapping Lookup, Bulk Sync APIs) achieving onboarding time reduction from 8 weeks -> 7 days, 80%+ platform adoption, and \$20M annual revenue impact. Platform architecture and API framework adopted as template for future convergence initiatives.
- **Data Ingestion, Pipeline Design & Quality:** Built an automated data reconciliation platform integrating Amazon's internal payment systems with an external government data portal, processing thousands of vendor records monthly. Designed multi-source data extraction pipelines across 36 critical attributes, established source-of-truth data architecture, and negotiated API integration with a blocked partner team to close a missing data gap. Improved data accuracy from 72% -> 89% and delivered \$1.8M annual savings through platform automation.
- **Platform Architecture & Cross-Functional Leadership:** Designed an ID transformation system bridging incompatible data architectures (UPC ↔ ASIN ↔ PLU), built event-driven sync infrastructure (SNS/SQS), and led 15+ cross-functional stakeholders across engineering, operations, finance, and external teams. Used strategic escalation and transparent negotiation to unblock critical platform dependencies and maintain platform roadmap velocity.

Growth (an Early-stage e-Commerce lending startup) – New Delhi, India

2018 – 2021

Product Manager

- **0-1 Platform Building:** Built SaaS lending platform from scratch, defining platform architecture, product roadmap, and GTM strategy. Onboarded 100+ SMB customers to platform infrastructure, disbursing \$7M in loans while achieving product-market fit in 1st year.
- **Platform Growth & Optimization:** Scaled platform adoption by 5x in 6 months through customer journey optimization and platform UX improvements. Led product strategy and cross-functional collaboration with engineering and marketing to drive platform growth.
- **Platform Pivot & Business Impact:** Led initiative to restructure platform lending channels in response to pandemic, achieving 20% revenue growth and 35% increase in loan disbursements through strategic platform prioritization and business model simplification.

EY (Ernst & Young LLP) – London, UK & New Delhi, India

2013 – 2018

Consultant

- Led smart city technology assessments and go-to-market strategies for government and telecom clients, managing stakeholder alignment and project delivery.
-

EDUCATION

University of Southern California | MBA STEM track | Class President
