EXECUTIVE SUMMARY

Platform Product Manager building integration platforms, API products, and multi-stakeholder systems. Has expertise in platform architecture, API strategy for B2B partners, and cross-functional collaboration across engineering, business, and risk teams. Scaled integration platform from 5 pilot users to 1,000+ active suppliers over 18 months while consolidating 5 legacy systems, achieving 90% onboarding time reduction and \$9.6M impact. Proven track record of designing reusable platform frameworks that enable product teams to launch faster while maintaining security and compliance. Experienced working across diverse platform domains (supply chain, financial operations, AI/ML automation), demonstrating ability to quickly learn new contexts while applying consistent platform architecture and leadership patterns.

SKILLS & TOOLS

PLATFORM ARCHITECTURE: Platform Architecture & Design | API Strategy & Development | Integration Platforms | Multi-Stakeholder Platforms | Systems Thinking | Platform Scalability (5 → 1,000+ users) | Adoption & Growth | API Platform for External Partners | Platform Onboarding Optimization | Platform Health Metrics | B2B Platforms

PRODUCT MANAGEMENT: Cross-Functional Leadership (Influence Without Authority) | Platform Strategy | Roadmap Development | 0-1 Platform Building | Platform Enablement for Product Teams | Data-Driven Decision Making | Risk & Compliance | Stakeholder Management

TECHNICAL: API Design (REST APIs) | AI/ML Product Development | Multi-System Integration | Data Architecture & ID Transformation | Event-Driven Architecture | Jira | Confluence | Figma | MS Office

EXPERIENCE

Amazon.com – Seattle, USA

2022 - Present

Sr. Product Manager – Technical

- **Platform Integration & Enablement:** Built integration platform consolidating Whole Foods Market's (WFM) 5 legacy systems into unified Amazon platform, enabling 1000+ external partners to onboard 90% faster (8 weeks → 7 days). Designed 3-layer platform architecture with custom API suite (Item Registration, Mapping Lookup, Bulk Sync) and ID transformation layer, achieving 80%+ platform adoption, 53% churn reduction, and \$9.6M impact in 1st year. Collaborated cross-functionally with engineering, business operations, and compliance teams to ensure scalable, secure platform delivery. Platform framework adopted as a reusable template for subsequent convergence initiatives.
- **Platform Architecture & Stakeholder Leadership:** Designed ID transformation system bridging incompatible data architectures (UPC ↔ ASIN), built API suite for complex data translation, and collaborated with engineering teams on platform scalability design. Led 15+ cross-functional stakeholders through transparent escalation and strategic negotiation to unblock critical platform dependencies, preserving cross-team partnerships while achieving platform objectives.
- **Financial Operations Platform & Multi-System Integration:** Built automated reconciliation platform integrating Amazon's internal payment systems with external government regulatory portal, processing thousands of vendor payments monthly. Collaborated with finance, accounting, and tax compliance teams to design data extraction pipelines across 36 critical attributes from multiple source systems, ensuring regulatory compliance while improving accuracy from 72% to 89%. Delivered \$1.8M annual savings through platform automation.
- **AI/ML Platform & Production Deployment:** Architected AI-powered document processing platform (OCR + ML) automating 3M+ annual invoices, coordinating across engineering, operations, and compliance teams. Designed template-based platform architecture and ran a 4-week experimentation phase to de-risk technical feasibility, achieving 80%+ accuracy (vs. 75% manual baseline). Made product trade-offs (95% automation, 5% exception management edge cases), scaled from 5-supplier pilot to production in 6 months, delivering \$2M annual savings.

Growth (an Early-stage e-Commerce lending startup) – New Delhi, India

2018 – 2021

Product Manager

- **0-1 Platform Building:** Built SaaS lending platform from scratch, defining platform architecture, product roadmap, and GTM strategy. Onboarded 100+ SMB customers to platform infrastructure, disbursing \$7M+ in loans while achieving product-market fit in 1st year.
- **Platform Growth & Optimization:** Scaled platform adoption by 5x in 6 months through customer journey optimization and platform UX improvements. Led product strategy and cross-functional collaboration with engineering and marketing to drive platform growth.
- **Platform Pivot & Business Impact:** Led initiative to restructure platform lending channels in response to pandemic, achieving 20% revenue growth and 35% increase in loan disbursements through strategic platform prioritization and business model simplification.

EY (Ernst & Young LLP) – London, UK & New Delhi, India

2013 – 2018

Consultant

- Led smart city technology assessments and go-to-market strategies for government and telecom clients, managing stakeholder alignment and project delivery.
-
